WORK EXPERIENCE

Lovable Labs Sweden AB

Fullstack Product Engineer

Jul 2026 - present

V3X Labs B.V., Remote

Research & Development engineer; Team lead

Dec 2022 - Mar 2024

- Led the development of a smart-badge printing and distribution platform, managing a team of engineers to integrate on-badge NFC with on-chain attendee profiles.
- Oversaw the deployment of this system across major industry events (ETHPrague 2023, EthCC 6, ETHDenver 2024), ensuring seamless performance for over 30,000 total participants
- Developed a specialized Java driver to bridge Zebra printing hardware with TypeScript microservices, integrating monitoring and observability for real-time system health tracking.

EDUCATION

Algebra Bernays University, Croatia

BSc in Software engineering

Sep 2023 – Jun 2026

(expected)

- relevant courses: *Object oriented programming, Mathematical analysis, Data structures and algorithms, Database development, Probability and statistics*

VOLUNTEERING & COMMUNITY

AlgoTrade Hackathon 2026

Core organizing team (Infrastructure & Task execution Lead)

Oct 2025 - Jun 2026

- Core organizer of an international algorithmic trading hackathon with a €10,000 prize pool, bringing together 300 top students from leading universities across more than 40 countries.

PROJECTS

Kontestis

github.com/ItKlubBozoLagan/kontestis

Competitive programming contest and evaluation platform built using TypeScript and Rust. Featuring a custom code evaluation system with sub 8ms precision. Actively hosting competitions for more than 1,200 users & hundreds of students in Croatia.

gas-orm

github.com/Antony1060/gas-orm

PostgreSQL ORM tool built completely in Rust with a large focus on developer convenience with specialized macros and compile time safety. Features full model mapping, complex relations, and migrations generation.

dbger.c

github.com/Antony1060/dbger.c

GDB-inspired lightweight x86_64 Linux debugger written entirely in C with minimal dependencies. Features a custom ELF disassembly library for program inspection and binary analysis.

MAJOR ACHIEVEMENTS

Software Development	Led a team of 3 to the 1st place in a Croatian national high school project development competition (100+ projects).
Cybersecurity	Represented Croatia at the European Cybersecurity Challenge in 2022 (Vienna, AT), 2024 (Turin, IT) and 2025 (Warsaw, PL).
Academic Excellence	Awarded a scholarship for the BSc in Software Engineering as a top-performing candidate.

SKILLS

Programming languages	Rust, TypeScript, C/C++, Java, Kotlin, Python, Go, C#
Technologies & tools	Linux, Bash, Git, Docker, Vim, Node.js, React, Kubernetes, ASP.NET
Languages	Croatian (native), English (fluent), German (conversational)
